

Memorandum

To: Rick Jensen

From: Sue Pope

Date: Ice melter product

Re: March 10, 2011

The University Of Utah Landscape Maintenance Department has been using your Ice melter products for a minimum of 12 years, which has been under my direct Supervision. We have found your product very successful in melting snow and Ice. While using this product over the many years, we have observed little salt Damage within our landscape and concrete. If damage has occurred, it is mainly Due to the method of application and not the products quality.

Throughout the years the Morgro Company has always provided us with Dependable and reliable service. Having the product available with prompt Delivery has allowed our department the ability to keep our campus safe during the Winter months.

Thank you for your service

Sue Pope

Landscape Maintenance Supervisor
